Based on a study of Soviet material available in Mar 60.

The present review was made in order to evaluate statements made by K. P. Stanyukovich concerning the possibility of decreasing gravity by using low-temperature phenomena and antimatter, and to ascertain Soviet capabilities pertinent to the invention or design of a space vehicle propelled by an intentional modification of gravity. Stanyukovich's statements are compared with views of other Soviet scientists (Fok, Ivanenko, Sokolov, Infeld, Landau, Ginzburg, and Bogolyubov). Bibliographies are included of Soviet and Western research on gravitation. The Soviet bibliog-
